WiFi issues, please help.

2019/08/28

So my WiFi is fast on everything but my phone. It has been doing well until recently, now i cant even open Instagram i have to use my mobile data (medium speed unlimited) which is much faster than my WiFi. My ISP is Spectrum we have high speed WiFi ( dual band too) my phone isn't that great (its the LG Fortune) but everything worked fine and fast until everything became slow. It is important to note that only my phone is being effected with two tablets ( all android), three phones (one of witch is mine, all android), 3 computers (all on WiFi), and two TV's (one wired) everything worked fine and fast until about a week ago. Also my router and modem are both property of spectrum. Thank you, i know this is weird but hope you can help.EDIT: Well when your wifi slows down, just reset the router...
